## DETAILED ACTION

### *Election/Restriction*

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-14, drawn to method of reducing superoxide damage or increasing resistance of an oxygen-labile protein to oxidation, classified in class 435, subclass 69.1.

II. Claim 15, drawn to method of screening compounds for antibiotic resistance by testing the compounds ability to affect YggX activity, classified in class 435, subclass 4.

2. The inventions are distinct, each from the other because of the following reasons:

Groups 1 and 2 are related as methods, however the methods are distinct as claimed because they have different processes steps (expressing YggX in a cell versus detecting YggX activity and contacting with a compound) and different final outcomes (reducing superoxide damage versus screening compounds for antibiotic properties). As such, the methods are distinct as claimed.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, as

Art Unit: 1645

shown by their different classification, restriction for examination purposes as indicated is proper and in the absence of restriction would place an undue search and examination burden on the examiner.

3. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

4. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(I).

5. Any inquiry of a general nature or relating to the status of this general application should be directed to the Group receptionist whose telephone number is (703) 308-0196.

Papers relating to this application may be submitted to Technology Center 1600, Group 1640 by facsimile transmission. The faxing of such papers must conform with the notice published in the Official Gazette, 1096 OG 30 (November 15, 1989). Should applicant wish to FAX a response, the current FAX number for Group 1600 is (703) 308-4242.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Patricia A. Duffy, Ph.D. whose telephone number is (703) 305-7555. The examiner can normally be reached on Monday-Friday from 9:30 AM to 6:00 PM. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Lynette Smith, can be reached at (703) 308-3909.
